

OMNILOG

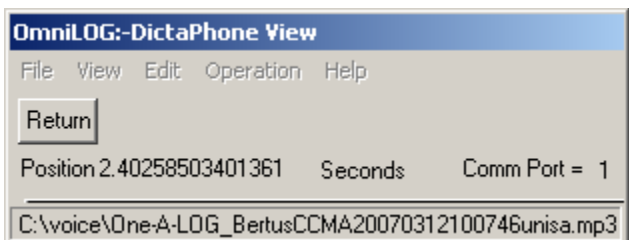

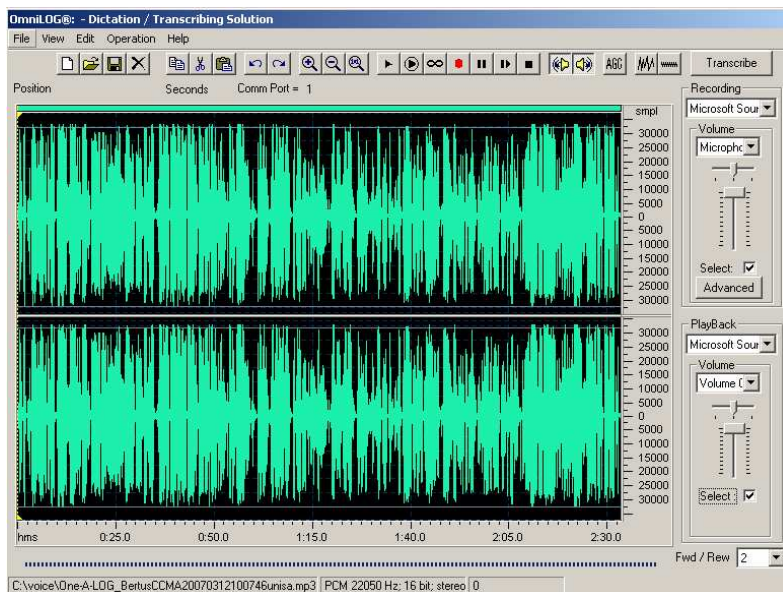

®

OmniScribe®

Product Overview

The OmniDictate® Transcribe Solution is ideal for people who require a cost effective recording and transcribing solution. This system is capable of recording any conversation directly onto your computer's Hard Drive and controlling the playback of conversations with "Rewind", "Start/stop", and "Forward" functions operated with a foot pedal.

The OmniDictate® solution consists of a dictating and transcribing module with a microphone, headset and foot pedal to control the voice recording.

Product Features

- Record keeping, which meets the requirements of the FAIS act
- Record all meetings and office conversations
- Disciplinary hearings
- Dispute resolutions
- Contract discussions

The Product

- The OmniDictate® Dictate and transcribe solution is a single channel, multi user office recording solution, with microphone, headset and foot pedal.
- Records in MP3 or WAV format.
- Record all conversations directly onto your computer
- Allow your typist to transcribe any conversation
- Dictate from any location in the world
