OmniLOG GPS / GPRS Tracking Equipment

The WorldTracker GPRS Extreme 15 Second Updates! Don't GPS it, Use Advanced GPRS And Get Updates Every 15 Seconds! You Can Actually Watch The Vehicle Move On The Interactive Real Time Mapping! Optional Long Live Battery Pack And Slap-It And Track-It Magnetic Mount!

New generation WorldTracker Extreme GPRS is the world's first tracking device with real-time updates every 15 seconds. Direct GPRS data connection gives you the most accurate and reliable tracking data ever! The entire functioning unit is as small as a set of car keys. Tiny, accurate, discreet, and reliable. The next generation of GPS tracking is here.

The WorldTracker GPRS is a self-contained complete hardware and software package small enough to fit in the palm of your hand. When placed with packages, vehicles, or personnel, the WorldTracker GPRS provides detailed reports of routes traveled for quality-control and security purposes.

GPRS World Tracker

Slap-It and Track-It Magnetic Mount Box

OPTIONAL SLAP-IT AND TRACK-IT MAGNETIC MOUNT BOX AND LONG LIFE BATTERY PACK

The slap-it and track-it magnetic mount box gives you a self contained box for your tracker for easy install with extra battery power that gives you a unit that will last for up to a month without recharging!

WorldTracker GPRS Features

- Self contained device fits in the palm of your hand. No external antennae needed, just plug-&-play.
- Location information is reported using a direct GPRS data connection.
- Mapping for the entire world using the latest cutting edge 3D maps from Google and Microsoft.
- Real-time location reports every 15 seconds.
- Geofence feature sends alert if the target moves from pre-defined area.
- Parking and Anti-theft Function: Pressing the Parking Button will start the anti-theft function.
- If your vehicle has been moved 100 meters the WorldTracker will send messages to the pre-set phone numbers to warn you of the vehicle movement.
- GPS assist function using GSM network, boosting location sensitivity when GPS signal is temporarily lost.
- Durable, lightweight, water-resistant housing.
- Enhanced sensitivity for indoor and outdoor reporting.
- Tri-band GSM 850/1800/1900 MHz for worldwide coverage.
- 12 volt DC adapter connects to vehicle power.
- Can be hooked up to 12 volt DC for permanent hardwire connection.
